This world comprises a human variety  
that tend to seek fellowmen's sympathy.

This lot project selves as sacrificers  
being exploited by family members.

They exaggerate even ordinary duties  
to exhibit selves as toiling drudgers.

Accusation they make against workplace  
like profession extracts work in excess.

Lamentation replaces their conversation  
intensely they try to obtain consolation.

They target to get respect and sympathy  
but self-pitying only lowers their dignity.

Letting others manipulate self is inability  
failing to view life positively is deficiency.
